GODcoin: Gold-on-Demand *Introducing the New World Currency*

The January 1988 edition of *The Economist* magazine predicted that a new “World Currency” would rise above all other forms of money and become the primary financial instrument in circulation, forecast to begin in 2018. We can assure you that this 30-year-old anticipation has not been made in vain. Looming geopolitical, socioeconomic, and environmental disasters, coupled with the public’s growing distrust for the conceptual design of fiat money and the eroding leadership of the central banking system, has driven consumers to order from a menu of alternative financial solutions made readily available due to the growing development of blockchain technologies and peer-to-peer economies.

It should come as no surprise that Bitcoin and similar cryptocurrencies have been preparing us for the future, albeit these payment systems have proven volatile and bear many inconveniences that have, until now, been left unresolved. It is, however, with great confidence that we can claim victory in finding the ultimate solution. We have arrived at GODcoin, and humanity is poised to accept it as the premium utilitarian currency.

GODcoin is a cryptocurrency which will be backed by gold and silver; a perfect union of innovative technologies and timeless commodities. To summarize what we are developing, we will now divulge some of the most pertinent details.

GODcoin will be simple, efficient, and secure because it will use a Proof-of-Stake (PoS) system of minting. By using Proof-of-Stake, the energy saving costs are enormous in comparison to the commonly used Proof-of-Work (PoW) consensus algorithm that Bitcoin and so many other cryptocurrencies rely on. This model will prove to be far more effective because it will process transactions quickly and at a small fraction of the energy required by PoW, so minters will be able to run a node on resource constrained systems provided there is adequate disk space. GODcoin’s unique minting system requires minters to obtain a bond by paying a fee, which grants the minter permission to receive the block rewards they labor for. Bonds ensure the security of the currency by preventing abuse of the network, and will also ensure that the currency is not simply created out of thin air.

GODcoin's technological advancements have created solutions to problems that plague other decentralized networks, but this is not all that we boast. To use and support GODcoin is to usher in an end to the corruption and greed which has infiltrated government and financial institutions. It is GODcoin's leadership which truly sets it above the rest. We are not simply creating a new currency; we are effectuating a new era constructed from righteousness, justice, and piety.

On the 28th of January 2011, the world witnessed the arrival of the Biblical Messiah. Major news networks worldwide reported the eyewitness footage recorded of Christ's Holy Spirit descending over the Temple Mount site in Jerusalem. The event fulfilled the expectations of the Messiah's arrival found in all three Abrahamic faiths. To Christians, he is known as Christ (Jesus); to Muslims as Isa, and to Jews as Moshiah. Today, however, he has returned with the new name meaning the "Word of God", and we properly address him as His Majesty Lord Ra-El.

Since his arrival, the world has witnessed 7 consecutive years of unprecedented natural disasters, social uprisings, geopolitical and socioeconomic unrest, wars and rumors of wars. This has been a thorough demonstration of the times we live in, and humanity now stands on the precipice of a major transition from this world to the next.

In this new world, led by the Messiah and his Elect, we will enjoy peace and prosperity, unprecedented advancement in all aspects of society, harmony between man and nature, and above all, an uncompromised unity founded and made requisite under the divine edict of a one world government and one world religion.

In the Book of Revelation ch. 3:18, Christ instructs us to "buy gold from him", and by order of His Majesty, GODcoin is now authorized for purchase and trade. The implementation of this new world currency comes in slight advance of the transition, so that we may secure the wealth for future generations to come by using what has already been created, and redirecting its purpose. Those who wisely invest in GODcoin now will create for themselves a greater opportunity to prosper in His Majesty's New Kingdom. Those who choose not to invest will miss the lifeboat to ride out the coming storm, and may ultimately struggle with infinitesimal provisions.

The Divinely-appointed King will take his throne very soon, and it would be very wise to place your trust in his hands. The perfect currency has arrived!

Public ICO and 40% coin bonus ends on the 30th of April 2018.

An Exclusive "Private Coin Offering" (PCO) opens to High Net Worth investors on the 1st of May 2018.
